AutoBiz AI: Powering the Next Wave of SME Automation

- Problem Statement ID: **PS-1**
- Problem Statement Title: **AI for Business - Intelligent Action Agent**
- Team Name: **The PROS**

Team: PROS

AutoBiz AI

Agents: Agents are LangGraph flows, each with a dedicated toolkit, specific persona, and working style. They can process RAG media, maintain long-term context, operate anonymously, and enable human-in-the-loop oversight.

Business: This is Professional Overview Of Real-time Business Analytics shown with Inforgraphics. All the unstructured data is processed by into structure and deduce ML-based prediction of future trends.

Community: Community to Explore Market Trends and a marketplace to hire/sell for people- made AI agents

Dashboard: A console for Controlling AI agents, managing Memory, Privacy and Manual use of tools.

Innovation: 1. Model of Hiring Agents (Not "Use Tools".)

2. Each Agent has dedicated tool suites, persona and All agents interact with each other. Example Agents:

- (a) Analysts - Analyses multi- format data, gives insights. (c) Creator AI - Creates branding designs using genAI.
- (b) Sales Agent - Predicts customer churn and drafts purchase orders. (d) Manager- Managed All other AI agents.

3. Mobile First Design for SMEs, Whatsapp Familiar Interface and multilingual, No-friction of UI-UX.

Tech Stack:

- Backend: FastAPI, Node.js
- AI: Multimodal LLM APIs, Hugging-face pre-trained models, Custom ML models
- Automation: LangGraph agents, UNDO-Event Sourcing (Reverse any action)
- Inspiration: ZOHO, Openclaw AI, Lindy-ai, n8n workflows.

Example User Flows:

1.Churn Prevention

Customer email arrives → Analyst detects churn risk (78%) → Manager suggests retention offer → Auto-send discount email

2.Invoice Processing

User photos invoice → OCR extracts ₹12,500 → Accountant updates ledger → Postman sends payment reminder

3.Lead Scoring

New inquiry received → Sales Agent scores lead (High: 85%) → Creator drafts proposal → Manager schedules call

4.Cash Alert

Analyst monitors cash flow → Predicts ₹50K shortage (7 days) → Suggests payment delay → Auto-reschedules vendor payment

WHERE PASSION TURNS INTO PROFESSION

Technical Feasibility:

- All components are open-source/affordable.
- Proven architecture (similar to Zapier + Lindy.ai)
- Deployable for <₹1000/month

Behavioral Feasibility :

- "Hiring team members" = familiar concept
- Chat interface works in any language
- WhatsApp like UI => sense of ease.

Challenges and Overcoming Strategies:

Data Quality Concern (Messy Indian SME Data)

- Solution: Pre-process + OCR(tesseract) + image LLM
- Fallback: Human-in-loop approval for high-risk actions

Integration Complexity (Multiple Domain tools)

- Solution: Use MCP, integrate with n8n/OpenClaw.
- Future: Business Plans for full- access of tools

Reliability & Autonomy- (Will SMEs trust Agents?)

- Solution: "Approval Mode" : AI suggests, human approves
- Progression: Auto-pilot mode after 30 days of use

Viability: Real - World Readiness

MVP hackathon-ready

Production version: 6-8 weeks

Target: 1000 SMEs in Year

Team: PROS

Business Strategy:

E-CELL MITAOE'S

11TH-12TH FEBRUARY

E-SUMMIT'26

WHERE PASSION TURNS INTO PROFESSION

Revenue Model :

- **Tiered SaaS:** Starter (Core Agents) & Pro (Multi-tool Access).
- **Success-Based Fees:** Small commission on "Action Results" (e.g., invoices recovered).
- **Enterprise API:** Custom created Agent-as-a-Service for larger firms.

GTM Strategy:

- **Word of Mouth:** Sell free-samples to local SMEs for feedback.
- **Community Marketplace :** Earning Incentives for users - Create & Sell Agents, earn commissions.
- **The Loop :** Attract first users through freemium+lucrative offers, traffic engages providers- and it loops.

Competitive Moat :

- Hiring **Workers** with **persona**, not just tools.
- **Predictive**, not just reactive.
- **Decides** when to **act** & when to **advise**.
- Customer Churn --> Draft retention Mail.
- Finance Query --> Give contextual advice.
- **Undo**, Approve features build **trust**.
- **Easy** to **start** use, **hard** to **let go**.

Scalability & Impact:

- **Target:** Capture 1% of the Indian MSME market (6.3 Crore businesses).
- **Efficiency:** Reduce "Admin Friction" by 80% per business.
- **Future:** The "Agent Store" - Community-driven agent marketplace.

Team: PROS

Potential Impact on SMEs:

- 🕒 Time: 25 hours/month saved (Admin → Growth)
- 💰 Money: ₹50K-2L/year saved (vs. hiring staff)
- 📈 Growth: 20% revenue increase (focus on sales)
- 🧠 Peace: Sleep better (agents work 24/7)

Benefits: Economic-

- 🇮🇳 6.3 Cr SMEs × ₹50K savings = ₹3.15L Cr impact
- 💼 Jobs: Not replacing humans, freeing them
- 🌱 Survival: Reduce 70% failure rate (cash flow help)

Benefits: Social & Cultural -

- 🧠 Multilingual (Hindi, Marathi coming in Q2)
- 🏙️ Tier 2/3 cities (mobile-first design)
- 👤 Student/New entrepreneurs (flexible work support)

Research & Resources:

(ALL RESOURCES ARE HYPERLINKED)

- 57% of work automatable with AI, unlocking \$2.9T economic value [McKinsey]
- 94% MSMEs recognize AI potential, India's AI market \$8B-\$17B [NASSCOM].
- 3-5x productivity gains documented [Lindy case study]
- 78% MSME automation scheme success [Government]
- 535M+ WhatsApp users, 98% open rate [Meta]
- ₹2.3 lakh crore unrealized efficiency gap [PwC]
